

Peter Hofer Austria

Shotgun Set of 5

Worldwide unique Shotgun Set of 5

Shotgun SxS cal. 12/12

Shotgun SxS cal. 20/20

Shotgun SxS cal. 28/28

Shotgun SxS cal. .410/.410

Shotgun OXU cal. .410/.410

Due to the construction time of 15 years a set of this kind will never be built a second time in the world.

Out of the full material we made the sidelock action for these shotguns which make up our set of five shotguns. The actions of the five shotguns are scaled from the 12/12 right down to the .410/.410 caliber shotgun according to the respective calibers. System Peter Hofer sidelock with catchbar and double underlug lock. Multi-level patterns on the receiver accentuate the elegant lines of this shotgun. Fine ejector fore-end, special construction as fore-end push piece. The easy handling and delicacy of this fine shotgun will give you and future generations much pleasure with every shot fired.

Custom-made stock: For this set of five we were able to find five stock blanks from the same piece of highest quality burl wood. The stocks were scaled dimension according to the caliber of the shotgun and are made of very fine-pored walnut burr. The technical parts were fitted into the increasingly small space inside the stock.

Engraving: Each of the five shotguns features a different bird. The typical feathers of the featured bird are engraved in relief on the top of the action, on the top lever and on the metal parts of the fore end. The concept is the same for all the shotguns of the set; the type of feather featured is different on every gun. The main engravings show wild fowl scenes featuring the specific bird. There is a different bird in different scenes on each shotgun, but the five shotguns clearly show a common concept.

The usual ornamental engraving has been dropped. The typical Peter Hofer landscape scenes are also engraved with the specific birds. The basic design of the composition can be recognized throughout the set.

Timelessly elegant and reliable for generations, this increasingly valuable set is unique in the world.
